

BUILDING ENTRY INTELLIGENT SECURITY INSPECTION SOLUTION

Advanced Threat Detection for Modern Facilities

Protect people, assets, and infrastructure with **intelligent security inspection technology** combining AI-powered X-ray baggage inspection with high-sensitivity metal detection, designed for modern high-traffic environments.

THE GROWING SECURITY CHALLENGE

Modern facilities such as hotels, corporate offices, government institutions, shopping malls, transport terminals, schools, hospitals, and manufacturing plants receive large numbers of visitors, employees, and deliveries every day. Many facilities still rely on intrusive and outdated manual inspection methods, such as physical bag searches and manual screening procedures.

Common Security Threats:

Concealed weapons

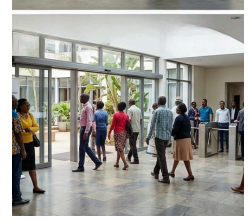

Prohibited items

Unauthorized access

Security breaches

Safety risks for occupants/visitors

Key Challenges with Traditional Methods:

Slow & Intrusive Inspections

Manual bag searches cause delays and long queues

High Risk of Human Error

Heavy reliance on human judgment increases mistakes

Poor Visitor Experience

Intrusive procedures make visitors uncomfortable

No Reliable Audit Trail

No digital records or inspection history

As security risks continue to evolve, organizations require modern technology-driven inspection systems capable of detecting threats quickly while maintaining a smooth and professional visitor experience.

INTELLIGENT SECURITY INSPECTION SOLUTION

Spans Ventures provides a comprehensive security inspection solution that strengthens facility security through advanced screening technologies. The solution combines:

AI-powered X-ray baggage inspection

High-sensitivity walk-through metal detection

Intelligent threat detection and alarm systems

Centralized monitoring and inspection reporting

This integrated approach allows security teams to screen both individuals and their belongings simultaneously, creating a multi-layer security checkpoint capable of detecting concealed threats quickly and reliably. The result is stronger security, faster screening, and improved operational efficiency.

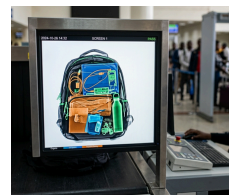

Security Checkpoint Workflow:

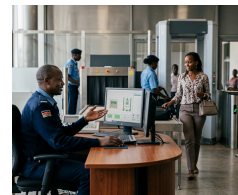

1. Personal Screening
Walk-through metal detector detects concealed metal objects

2. Baggage Inspection
AI-powered X-ray scans bags and parcels

3. Image Analysis
Advanced material recognition identifies threats

4. Security Review
Operators verify alerts and allow safe entry

Advanced Technology Features

AI-Powered X-Ray Imaging
High-resolution images with intelligent enhancement

Multi-Zone Metal Detection
Precise location identification of concealed metal objects

Material Identification
Color-coded visualization of organic/inorganic/metallic items

Intelligent Alarm System
Visual and audible alerts with digital event recording

WHY CHOOSE THIS SOLUTION?

Our solution strengthens security while maintaining smooth visitor flow. Facilities benefit from improved detection, reduced errors, and enhanced safety, all presented professionally.

Key Benefits of Intelligent Security Inspection:

- Enhanced threat detection accuracy with AI-powered screening
- Faster and seamless entry processing for high-traffic environments
- Reduced human error through automated inspection systems
- Real-time alerts and incident response for improved security control
- Centralized monitoring and reporting across all entry points
- Scalable solution for different facility sizes and industries

Perfect for Multiple Facility Types:

Hotels and Hospitality Facilities

- Screening luggage and packages
- Monitoring visitor entry points
- Securing conference/event areas

Commercial Buildings

- Screen bags/parcels entering
- Detect prohibited items early
- Maintain controlled access points

Corporate Offices

- Controlled entry screening
- Detection of prohibited items
- Integration with corporate security systems

Schools and Educational Institutions

- Bag screening at campus entrances
- Detection of prohibited items
- Secure access during school events

Government Institutions

- Safe visitor screening
- Detection of prohibited items
- Protection of personnel/public assets

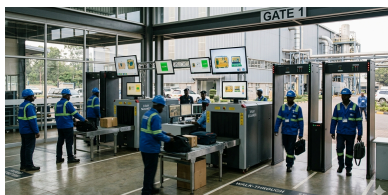

Shopping Malls and Retail Cent

- Maintain secure entrances
- Detect prohibited items
- Protect shoppers and retailers

Transport and Mobility Hubs

- Efficient passenger screening
- Baggage inspection
- Threat detection in high traffic environments

Manufacturing & Industrial Facilities

- Screen employees and contractors
- Monitor deliveries and logistics access
- Protect critical infrastructure

Healthcare Facilities

- Screening of visitors/belongings
- Protection of restricted medical areas
- Improved facility safety

WHY CHOOSE THIS SOLUTION?

INTEGRATED SECURITY ECOSYSTEM

The inspection solution integrates seamlessly with other security technologies including:

- CCTV surveillance systems
- Access control systems
- Visitor management platforms
- Security command centers
- Centralized monitoring platforms

This enables organizations to build a fully integrated and intelligent security infrastructure.

WHY SPANS VENTURES LTD

Spans Ventures Ltd is a trusted ICT and security systems integrator in Kenya, delivering advanced security technologies for modern facilities.

With over 20 years of experience, we specialize in:

Security inspection solutions

CCTV and video analytics

Access control systems

Visitor management platforms

Integrated security infrastructure

Our solutions are designed to enhance safety, improve operational efficiency, and support modern security operations.
